

--25. The application menu selecting and activating method of claim 20, wherein the pattern is an indication rod.--

--26. The application menu selecting and activating method of claim 20, wherein the pattern is an indication rod having two different patterns.--

--27. The application menu selecting and activating method of claim 20, wherein the recognizing of the pattern position is performed on the ground of one of two different patterns, and the activating of the menu is performed on the ground of the other of the two different patterns.--

--28. The application menu selecting and activating method of claim 26, wherein the recognizing of the pattern position is performed on the ground of one of two different patterns, and the activating of the menu is performed on the ground of the other of the two different patterns.--

--29. The application menu selecting and activating method of claim 20, wherein the selecting of the menu is performed when a background color of the pattern is converted in accordance with conversion of a user's pattern position.--

--30. The application menu selecting and activating method of claim 20, wherein the activating of the menu is performed when a user's particular body motion is executed.--

--31. The application menu selecting and activating method of claim 20, wherein the activating of the menu is performed after a particular pattern is positioned within the predetermined pattern region for a predetermined time period.--

--32. The application menu selecting and activating method of claim 25, wherein the indication rod comprises:

a body grabbable by the user;

a first pattern portion formed on a side end of the body;

a second pattern portion disposed at an outer end of the first pattern portion and guidable through the first pattern portion; and

a button for guiding the second pattern portion into and out of the first pattern portion.--

--33. The application menu selecting and activating method of claim 21, wherein the pattern is a user's hand.--

--34. The application menu selecting and activating method of claim 21, wherein the pattern is a ring wearable by the user.--

--35. The application menu selecting and activating method of claim 21, wherein the pattern is an indication rod.--

--36. The application menu selecting and activating method of claim 21, wherein the pattern is an indication rod having two different patterns.--

--37. The application menu selecting and activating method of claim 21, wherein the recognizing of the pattern position is performed on the ground of one of the two different patterns, and the activating of the menu is performed on the ground of the other of the two different patterns.--

--38. The application menu selecting and activating method of claim 36, wherein the recognizing of the pattern position is performed on the ground of one of the two different patterns, and the activating of the menu is performed on the ground of the other of the two different patterns.--

#### **REMARKS**

Claims 1-38 are pending. Claims 1-22 were allowed in the Notice of Allowance dated July 17, 2000. Added dependent claims 23-38 are similar to dependent claims 4-12 and 14-18 and thus additional search is not necessary. These claims depend from independent claims 20
